RN duties will include: assessing, planning, implementing and evaluating the care for each resident, performing personal nursing care as well as palliative care (when required), communicating with resident family members and being an effective liaison with our medical director and attending physicians.

Your **ADOC responsibilities** will include: working closely with our DoC and the full-time ADOC in providing effective supervision of front-line clinical staff, ensure care meets compliance requirements, assist in identifying areas of improvement for staff development and work with the DOC to ensure overall effectiveness of training.
